UNITED BULB COMPANY
MOUNT CLEMENS, MICHIGAN

Spring, 1932

TO OUR PATRONS

Each year we test many new varieties of Gladioli and add in our new spring catalogue only such as are distinct improvements over existing kinds. We trust that our patrons will use any descriptive matter they might find useful.

This catalogue only contains Gladioli, Dahlias, Cannas and other spring bulbs; for Narcissi, etc., which are delivered in the early fall, we will send out special price lists in January-April. Just a word about Daffodils: At this writing, September 4th, there are 12 carloads of Daffodils moving from our Woodland Wash branch, to the various distributing points in the east. Needless to say, that we are very proud of this achievement, the more so, because we anticipate the fullest satisfaction of the quality we supply. For counter trade, our customers will find these bulbs, large, firm and sound; for greenhouse forcing, our florist friends will find the quality and substance of the flowers unequaled. We have proved these past years that varieties such as Victoria, Golden Spur, etc., can be grown without basal disease. The cool climate of the State of Washington is superior to any other state of the Union for the production of Daffodils.

Yours respectfully,

UNITED BULB COMPANY.

TERMS OF SALE

Prices in this catalogue are in anticipation of a normal crop, and therefore subject to market fluctuations. After bulbs are harvested and during the selling and shipping season, we regularly mail our monthly stock lists with current prices. At such prices, orders are accepted subject to stock being unsold upon receipt of order.

All goods are sold f. o. b. Mt. Clemens, Mich., and travel at purchaser's risk, unless otherwise agreed. Cases and packing will be charged for at cost price.

Accounts are due 30 days after date of invoice; two per cent discount is allowed for payment within 10 days after date of invoice and three per cent is allowed for cash with order.

If at the time of shipment of any order or part thereof, purchaser has failed to settle his old accounts, or if we have reason to believe that his credit standing has suffered lately, we reserve the right to cancel all arrangements for transactions not yet executed.

We give no warranty, expressed or implied, and will not be in any way responsible for the results of planting or forcing of any bulbs, roots or plants we send out; we guarantee all varieties to be true to the name and description.

Complaints and claims about quality cannot be entertained unless made within two days upon receipt of the goods.

All agreements, different from the above terms, have to be in writing; no verbal agreements will be considered.

By placing orders, buyer is considered to agree with these terms.

HINTS FOR FORCING GLADIOLI

Buy only those varieties that are most suitable for greenhouse forcing and use large bulbs, 1½-inch up. Early ordering ensures the right kind of stock.

Two years old, high-crowned bulbs give the best results; they must have been dug early and stored away for about 3½ months in a well ventilated warehouse at the right temperature.

July-August dug bulbs can be planted in December, September dug bulbs about the middle of January; plant 5-6 inches apart, both ways.

In raised benches they bloom earlier than in ground benches.

Do not water too much for the first eight weeks, the time required for the new bulb to get established independently from the old one planted; after that the new bulb starts to grow and needs more water, increasingly so towards spring and blooming time.

Temperature between 48 and 52, a little warmer towards blooming time. The more light and sunshine, the better; if they are shaded too much, many will come blind.

TRUE TO NAME GLADIOLI

Prices are quoted per 1000, unless otherwise stated. 100 of a variety will be sold at the 1000 rate. Add 10% to all orders for less. Special prices on large quantities.

ANEMONES

Anemones can be planted outside any time in the spring. For greenhouse forcing plant during August in three-inch pots. Transplant in October in soil with perfect drainage, peat and sand mixed preferred. Space 8-10 inches both ways and water sparingly until the plants are up. Pinch out yellow and rotting foliage when growing. The small bulbs are better for forcing than the large bulbs.

NARCISSI

(Washington Grown)

Ever since the embargo on Narcissi went into effect we have been supplying our customers with the finest quality Daffodills money can buy.

Our own cultures of over 60 acres of all of the leading commercial varieties put us in a position to give you the best that can be had.

Prices for fall, 1931, delivery will be ready about January 15th. May quote you on your requirements?

PAPERWHITES

(Florida Grown)

These bulbs are grown around Jacksonville, Fla., which district is getting to be more and more known as producing the best Paperwhites. We ship out only perfectly round bulbs, which bloom with one, sometimes two good spikes; the oval shaped ones usually come with many shoots of grass and no flowers or very poor ones.

Good Paperwhites will be scarce again; let us send you our lowest prices and make reservations for you before the best are sold.

REGALE LILIES

The demand for this beautiful Lily has greatly increased in the last few years. It is the one Lily which will thrive best in this country. Color white, slightly suffused pink, with light yellow center. Very fragrant.

Plant September-October or early spring. Perfectly hardy. It is best to leave them undisturbed for several years; by doing so they will throw larger flower spikes and more and more florets every year.
